

Website Optimization & Information Architecture Brief

Phase 2 implementation direction based on the approved Strategic Alignment

Purpose and implementation guardrails

- Translate the approved commercial alignment into a clearer B2B website structure and ICP journey.
- Prioritize reuse, consolidation and relocation of existing approved material before creating net-new content.
- The objective is “make the existing website commercially clearer and more effective within a controlled optimization scope.”
- WE WILL Technology remains the master brand. Vibe Test is the lead product under the same website and domain.

I. Recommended Website Architecture

Master brand architecture: WE WILL Technology is the company/master brand; Vibe Test is an endorsed product under WE WILL Technology; Business Care Quality (BCQ) remains the methodology/expert-service layer.

Navigation	Commercial role	Primary purpose
Home	Positioning + routing	Establish WE WILL’s proposition, introduce Vibe Test, surface approved buyer problems, build trust and drive the next action.
Vibe Test	Product evaluation	Dedicated product page within wewill.tech. Explain product value, operation, evidence and the guided proof-of-value motion.
Solutions	Buyer-problem evaluation	Organize the approved five use cases around buyer problems; show Vibe Test and BCQ expert support where relevant.
Resources	Authority + retained content	House the existing blog/insights and, only where useful, background methodology such as Quality Canvas / Triad Framework.
About	Company credibility	Concise company story, team, quality philosophy and selected credibility elements.
Primary CTA	Conversion	Run a Guided Vibe Test.

II. Priority ICP Journey

Primary ICP: CTOs, engineering leaders and founders in growth-stage SaaS / digital-product companies, with Saudi Arabia as the priority beachhead.

Journey stage	What the website must achieve
1. Land	Understand quickly that WE WILL helps product teams determine what is safe to ship.
2. Recognize	Identify with one of the five approved buyer problems / release situations.
3. Evaluate	Explore Vibe Test as the lead product or the relevant Solutions use case.
4. Trust	See client logos, selected testimonials, evidence and the WE WILL expert layer.
5. Convert	Run a Guided Vibe Test proof of value; enterprise/high-risk buyers can discuss a BCQ requirement.

III. Page-by-Page Block Structure

Page	Block	Purpose / content direction	Action	CTA
Home	Hero	Approved company-level proposition; clarify the release-confidence / safe-to-ship outcome and target buyer.	EDIT	Run a Guided Vibe Test
Home	Social proof strip	Compact client-logo strip/carousel high on the page for immediate credibility.	EDIT	—
Home	Vibe Test introduction	Introduce Vibe Test as the lead product under WE WILL Technology and route to the dedicated product page.	EDIT	Explore Vibe Test
Home	Buyer problems / use cases	Preview the five approved use cases; route into Solutions rather than explaining each in full.	NEW	Explore Solutions
Home	WE WILL expert layer	Briefly explain the combination of Vibe Test + BCQ methodology / expert judgment.	EDIT	Discuss a Quality Requirement

Home	Selected proof	2–3 strongest testimonials / evidence points; remove the current repetitive testimonial treatment.	EDIT	—
Home	Selected resources	Surface a small number of existing blog / insight items.	REUSE	View Resources
Home	Final conversion	Close with the primary commercial action and secondary expert-service path.	EDIT	Run a Guided Vibe Test
Vibe Test	Product hero	Vibe Test by WE WILL Technology; retain the current strong product proposition and product-first presentation.	REUSE	Run a Guided Vibe Test
Vibe Test	Problem / context	Why manual or conventional verification does not keep pace with modern product delivery.	REUSE	—
Vibe Test	What it does	Tests critical journeys, identifies issues, supports fixes and re-verifies changes.	REUSE	—
Vibe Test	How it works	Retain the current product workflow / autonomous-agent explanation where accurate.	REUSE	—
Vibe Test	Capabilities + evidence	Product capabilities, receipts/evidence, screenshots or existing proof.	REUSE	—
Vibe Test	Who it is for	Growth-stage product and engineering teams; align to approved segmentation.	EDIT	—
Vibe Test	WE WILL connection	Make the endorsed-product relationship explicit and provide a path to broader quality support.	NEW	Discuss a Quality Requirement
Vibe Test	Conversion	Replace generic demo language with the agreed guided proof-of-value motion.	EDIT	Run a Guided Vibe Test
Solutions	Page introduction	Frame the page around buyer problems, not an internal services catalogue.	NEW	—
Solutions	1. Release verification	Frequent releases; Vibe Test on critical journeys; faster evidence-based cycles.	NEW	Run a Guided Vibe Test
Solutions	2. AI-assisted development	Development output exceeds QA capacity; verification must keep pace.	NEW	Run a Guided Vibe Test
Solutions	3. AI Feature Evaluation	AI-feature launch; WE WILL approach executed through Vibe Test; evidence against risk criteria.	NEW	Discuss / Run Guided Vibe Test
Solutions	4. Release decision	High-impact launch; BCQ Expert Services + test evidence for accountable go/no-go advice.	NEW	Discuss a Quality Requirement
Solutions	5. Lean-team quality	Limited QA leadership/capacity; Vibe Test + Managed Quality Care.	NEW	Discuss a Quality Requirement

Solutions	Methodology / supporting capabilities	Use existing Business Care Quality, testing, automation, UX, security-aware testing and consulting material only where it supports the five buyer problems.	EDIT	—
Solutions	Proof	Place relevant testimonials/evidence beside the most relevant buyer problem where possible.	EDIT	—
Resources	Blog / insights	Retain the existing blog / knowledge content in a dedicated resource area.	REUSE	Read
Resources	Background methodology	Quality Canvas and Triad Framework may sit here only if still useful and coherent; otherwise omit.	EDIT	—
About	Company story	Short company background and current Agentic Software Quality positioning.	EDIT	—
About	Team	Move the existing team content from the long homepage into a dedicated company context.	REUSE	—
About	Quality philosophy	Concise explanation of how WE WILL approach quality; avoid duplicating Solutions.	EDIT	—
About	Credibility	Selected clients / proof where useful, without repeating the full homepage proof stack.	REUSE	Talk to Us

IV. CTA Framework

CTA	Role	Recommended placement
Run a Guided Vibe Test	Primary acquisition CTA; the agreed proof-of-value entry motion.	Top navigation, Home hero/final section, Vibe Test page, relevant Solutions use cases.
Discuss a Business Care Quality Requirement	Secondary enterprise / higher-risk quality path.	Solutions use cases requiring expert judgment; Vibe Test expert-layer section; selected Home support block.
Explore Vibe Test / Explore Solutions	Navigation/routing CTAs, not primary conversion actions.	Home sections only.

5. SEO Audit Seed Keywords

Purpose: These are strategic seed terms for the website team to validate through keyword research, search-volume analysis, competition review and Saudi/GCC localization. They are not final SEO targets.

Seed keyword / theme	Search intent	Likely page	Audit note
agentic QA / agentic software testing	Category / emerging solution	Home, Vibe Test	Validate terminology adoption and search demand before making it the sole keyword anchor.
autonomous QA testing / autonomous software testing	Product/category	Vibe Test	Strong fit with Vibe Test proposition; compare variants.
software release verification / release readiness testing	Problem / solution	Solutions, Vibe Test	High alignment with approved release-verification use case.
AI software testing / AI-assisted development testing	Problem / solution	Solutions	Audit both testing-with-AI and testing-AI ambiguity.
AI feature testing / AI feature evaluation	Use case	Solutions	Specific approved use case; validate buyer terminology.
continuous software quality / continuous QA	Solution category	Home, Solutions	Useful bridge between recurring verification and expert quality support.
QA as a service / managed QA services	Service / commercial	Solutions	Audit relevance against BCQ Expert Services; avoid reverting to a generic outsourced-QA position.
software quality consulting / release decision support	Expert service	Solutions	Supports BCQ diagnostic / release-decision path.
software testing Saudi Arabia / QA services Saudi Arabia	Local commercial	Home, Solutions	Validate KSA search volumes and Arabic/English variants.
AI testing Saudi Arabia / software quality Saudi Arabia	Local + emerging category	Solutions, Vibe Test	Use only if data supports demand.
